

GALLERY UPDATE - AUGUST 2008

NEW GALLERY SPACE

We are pleased to announce that Sue Ellen Gallery will be relocating within the Marina Mirage. Our new showcase space is located on the upper level at the reconfigured Broadwater end of the Centre. With the Marina Mirage's renewed focus on its spectacular waterfront location, our new Gallery position will be highly visible from both the upper and lower levels - you will have no trouble locating us.

We look forward to welcoming you to the new Gallery in mid-September.

INTRODUCING GIORGIO ARMANI PENS – SYMBOLS OF CHARACTER AND STYLE

Sue Ellen Gallery is Queensland's only authorised stockist of the new, limited-edition Giorgio Armani Pens. The first series, the *Regal* collection, arrives in Australia in September in extremely limited quantities.

Says Giorgio Armani, "a handwritten note is today more than ever a sign of etiquette, elegance and sophistication. To carry an iconic pen is therefore a symbol of character and style".

The *Regal* collection is limited to 199 numbered pieces of each writing instrument worldwide. There is a choice of ballpoint, roller ball and traditional fountain models. Only 3 sets of the *Regal* series will be available in Australia.

COMING SOON – GUCCI WATCHES

Gucci is one of the world's most recognised luxury fashion brands, and Gucci watches are renowned for their superior quality and unique blend of Italian style and Swiss watch-making craftsmanship. Sue Ellen Gallery will be adding this highly desirable luxury watch brand to its collections in the near future.

NEW COLLECTIONS FROM CLIO BLUE

Direct from Paris, Clio Blue's seasonal jewellery collections in sterling silver interpret the latest European trends. This season we are seeing some of the most dramatic looks yet, including oversized, statement-making bracelets and polished bangles.

Clio Blue's romantic side is revealed in beautiful sterling silver and gemstone necklaces and bracelets featuring hearts, *Love* and *Amour* motifs. Or you can toughen up your style with a combination of silver, black leather, onyx and black agate.

CLIO BLUE WATCHES

The new Clio Blue watch collection arrives in late August. Crafted in sterling silver, stainless steel and leather, the range includes styles for women and men.

The bracelet-style watches layer beautifully with other bracelets to create a luxurious look.

ANCIENT FUTURE: HANDCRAFTED CONTEMPORARY MOKUME GANE JEWELLERY

The ancient art of mokume gane was developed by sword smiths in feudal Japan. Layers of precious metals were fused by heat and pressure, then forged, carved and finished to produce uniquely patterned metal for samurai sword "furniture".

Australian jeweller Darren Jackson continues to develop the modern mokume gane technique, which he uses in his Ancient Future jewellery collection. Using a solid state diffusion technique developed by NASA, layers of precious metals including gold, silver and copper are fused together but do not melt. Darren then forges, rolls and carves the precious metal to create unique patterns. The patterning process can be influenced but not repeated, ensuring every piece of Ancient Future jewellery is unique.
